

STATION 2

STUDY PROCESS AND THE ROLE OF PUBLIC INVOLVEMENT

This station illustrates the Five Step Planning Process being used to identify the area's transportation problems and needs, to develop and evaluate alternative solutions and to prepare a long range strategic plan.

Public involvement is vital to the success of this study every step of the way. In addition to public workshops like today's event, the planning process is being directed by monthly meetings of an Advisory Committee comprised of local area members representing the people living and working in this part of Butler County.

An exhibit displaying the names of persons and organizations participating in this study by serving on this Advisory Committee is also your source of contact for obtaining more information and another vehicle for your input. Many of these representatives are in attendance at this workshop today. In addition, the monthly Advisory Committee meetings are open to the public.
